

CARBIDE BURR GUIDE

DOUBLE CUT - DC:

With their precision cutting action, Double Cut produces small chips instead of long slivers. This eliminates clogging. Ideal on steel/stainless steel alloys and exotic metals.

SINGLE CUT - AL:

The mill style flute allows for fast chip flow and fast stock removal. Ideal for Aluminum and non-ferrous metals.

SA
Cylindrical burr with plain end

SB
Cylindrical burr with end cut

SC
Cylindrical burr with radius end

SD
Ball-shaped burr

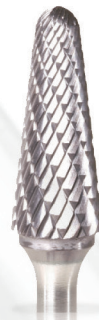

SE
Oval-shaped burr

SF
Tree-shaped burr with radius end

SG
Tree-shaped burr with pointed end

SL
Taper burr with radius end
